The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 23-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Kwak et al, Eur. Patent 688772 cited by applicants.

It discloses the instant process using aqueous mixtures of solvents such as ethanol, acetonitrile etc. See claim 8.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 12-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kwak et al in view of Irikura et al, Eur. Patent 183129 cited by applicants.

The former is used as above. The latter in the same type of reaction of pyrrolidines with condensed 7-leaving group-pyridin -4-one-3-carboxylic acids discloses at p. 3 that solvents such as water, alcohols, acetonitrile, etc. may be used. Thus because of the teaching of the use of water alone as a solvent alternative to other organic solvents including those taught by Kwak et al for use together with water one of ordinary skill would have been motivated to use water alone as solvent in the instant reaction.
